

ZACHARY UPSTONE

[Website](#) | [Email](#) | [GitHub](#) | [LinkedIn](#)

Software Developer with commercial experience building large-scale SaaS applications using TypeScript, Vue, React and Angular. Experienced delivering production features end-to-end, improving developer tooling, and maintaining applications used across 100+ digital publications.

EXPERIENCE

Pugpig

Product Developer

London, UK

Oct 2024 - Present

- Led migration of multiple production codebases from JavaScript to TypeScript, improving type safety, reducing future maintenance costs and enabling safer feature development.
- Improved the platform's theming and localisation architecture to support 100+ publications with minimal custom code, while maintaining a robust automated test suite for safe, repeatable releases.
- Delivered customer-facing features from discovery to post-release analysis, including personalised Followed Topics timelines and toast notifications that increased feature discovery by 30%.
- Implemented a redesigned subscription flow alongside designers and QA, increasing subscription conversions by 17%.
- Modernised the iOS application to support Apple's new Liquid Glass design system across legacy devices and highly customised publication themes.

Bsquare

Software Developer

Trowbridge, UK

Jul 2022 - Jun 2023

- Delivered new product features, including an OS updates dashboard and interactive onboarding experience, while supporting debugging and QA throughout Agile development cycles.
- Expanded the automated testing suite with unit, API and UI tests using Gherkin and Selenium, and automated Zephyr test uploads with Python.

PROJECTS

- **Short Storey** - [GitHub](#) | [Demo](#) - Full-stack story-sharing platform for publishing short stories, built with Vue, Pinia, Fastify, Prisma and PostgreSQL, with automated testing using Jest.
- **Spotify Roulette** - [GitHub](#) - Real-time multiplayer music quiz using React, the Spotify API and Web-Sockets to synchronise gameplay between players.
- **Chrome Context Control** - [GitHub](#) - Chrome extension allowing users to customise the browser context menu by reordering, hiding and modifying menu actions.
- **WalkAnywhere** - [GitHub](#) - SwiftUI walking app using HealthKit and Apple Maps.

EDUCATION

University of Bath

2020 - 2024

Computer Science BSc (First Class Honours)

Dissertation: Explored reinforcement learning from human feedback for image synthesis using Python.

Chesham Grammar School

2013 - 2020

A level: Further Mathematics (A), Mathematics (A*), Computer Science (A), Physics (A).

KEY SKILLS

Frontend: Vue • React • Angular • HTML • CSS

Backend: Node.js • Express • Fastify

Languages: TypeScript • JavaScript • Swift • Kotlin

Tools: Git • Docker • Jira • Bitbucket

ACHIEVEMENTS

- AWS Certified Cloud Practitioner
- Volunteered at WorkAid for 18 months
